UNSOLVED
QUESTIONS

and

present the lecture series

Publish or Perish ...?

How Current Publication Practices Affect Science

The first lecture will be given on

Honesty in Science

by

Prof. Dr. Siegfried Hunklinger,
Ombudsman of the DFG

13.04.2011, 10 a.m.

Staudinger Weg 9, 3rd floor, MAINZ seminar room 03-122

Frequent publications draw attention to scholars, help to ensure continued funding, and are crucial to further a career in academia. In consequence, scientists suffer constant pressure to publish new work frequently and spend considerable time writing papers. Is this compatible with the principles of science?

And what are the principles on which modern natural science is based?

In loose succession, we will explore and scrutinize publication practices currently common in natural science and investigate how they affect scientific research.
